

4. The inspection scheme of monitoring inspection:
 - (1) Location receiving the inspection:
 - a. Commodities produced domestically: the inspection shall be applied in accordance with the production place to the inspection authority in the jurisdictional region; the inspection may be applied to the inspection authority in other jurisdictional regions if necessary.
 - b. Commodities imported via agency or importer: the inspection shall be applied in accordance with the ports where the commodities arrive to the inspection authority in the jurisdictional region; the inspection may be applied to the inspection authority in other jurisdictional regions if necessary.
 - (2) Inspection location: the inspection authority commissioned by the BMSI.
 - (3) Inspection time limit: within 7 workdays from the day when the sample of commodities subject to inspection arrives at the inspection authority.
 - (4) Inspection charge: 0.25% of the shipping wholesale prices for commodities produced domestically (untaxed) or the CIF for commodities imported. Where the minimal charge per batch is assessed less than NT\$500 will be charged at NT\$500 whereas the charge of the part exceeding NT\$100,000 will be reduced to half thereof.
 - (5) The commodity inspection mark is comprised of a set of pattern and ID No. where the ID No. shall be closely next to the right side or the underneath of the basic pattern.

The pattern of the commodity inspection mark is

The ID number of the commodity inspection mark shall be comprised of a set of an alphabet, serial numbers or specified codes pursuant to the diversity of inspection schemes.

- a. For the inspection obligatory applicant who applies for the self-printed commodity inspection mark, the inspection obligatory applicant shall apply to the local inspection authority with jurisdiction for the application of self-printed alphabet M and the specified codes.
- b. When the inspection obligatory applicant applies for toy commodities, the self-printed commodity inspection mark M00000 and batch No. [no repeated usage is allowed] shall be filled out in details on the commodity inspection mark column and batch No. column of the inspection application form. Moreover, M00000 and batch No. (7-number) shall be separated in upper and lower lines together labeled on the body of the commodity concerned or the minimal package thereof and close to the right side or the underneath of the basic pattern as to implement the post-market management mechanism and commodity tracing function.

For example: 2007001 [as the first batch toy commodities imported or produced in July 2020; the first and second numbers are the rear 2 numbers of the western year of the imported or produced date in principle; the third and fourth numbers are the month of the imported or produced date; the fifth to seventh numbers are serial numbers]

An example:

M00000

or

M00000

Batch No. 2007001

Batch No. 2007001

(6) Inspection scheme:

- a. The inspection obligatory applicant shall apply for toy commodities inspection in accordance with Regulations Governing Monitoring Inspection and submit the photo or pre-printed specimen page of Chinese label for batches that are sampled, as well as register all of the names of the toy commodities in the name of commodities of the application form for BMSI inspection computer system of the with e-file as applying for the inspection of toy commodities imported or produced domestically; the name of commodities may be attached the appendix. The application shall be denied if the application is not handled in accordance with the previous regulations. It requires the inspection obligatory applicant to submit the re-application for inspection with the supplemented or corrected data.
- b. Where the toy commodities applies by the same inspection obligatory applicant for inspection conform to the provisions via batch-by-batch inspection for the consecutive 10 batches, the inspection will be exercised via the random-selected batch inspection as known as 50% per batch; afterwards, where the commodities conform to the provisions for the consecutive 10 batches, the inspection will be exercised via random-selected batch inspection as known as 20 % per batch.
- c. Where any inconformity occurs in the sampled batch, the toy commodities applied by the same inspection obligatory applicant for inspection must require the conformity to the provisions for the consecutive 10 batches; afterwards, the inspection will be exercised via the random-selected batch inspection as known as 50% per batch will be exercised on the follow-up batches.
- d. The sampling proportion of the sampled batch is one out of five for those within 100 items in principle, but each sampled batch shall be sampled one item at least and five items at most; for those exceeding 100 items, every 20 items of the exceeding part add 1 sampling inspection item of which 2 pieces (sets) are sampled. However, such a sampling proportion may be adjusted flexibly in accordance with the actual requirements.
- e. The inspection and the check of commodity inspection mark and Chinese label must be exercised on the sampled item(s). Where the whole batch of toy commodities has obtained the type test report issued by the designated testing laboratory for toy commodities (hereinafter referred to as the “designated testing laboratory”) recognized by the BMSI (confined to the identical type test report within 12 months prior to the application for inspection), it requires to perform the onsite check of the items such as packages, exterior appearance, commodity inspection mark and Chinese label.
- f. Batches of toy commodities are not sampled under random-selected batch inspection and shall execute the check of computer database to confirm the conformity of the commodities subject to inspection to the qualification of releasing after document examination. The list of toy commodities verification is sampled by computer system, as well as in accordance with the ways prescribed as below:
 - (a) The random-selected batch verification on exterior appearance, commodity inspection mark and Chinese label by batches as known as 50% per batch is exercised; the sampling inspection may be exercised if necessary.

- (b) The procedure of release after document examination shall apply to batches of commodities that are not sampled under random-selected batch verification.
- g. Where the toy commodities are approved for the prior release by the inspection authority receiving the application for inspection, the inspection obligatory applicant shall notify the inspection authority to execute the check of commodity inspection mark and Chinese label, sampling and sealing at the location where the commodities are stored after the relevant procedures are accomplished.
- h. For toy commodities that could happen the inspection inconformity, the inspection obligatory applicant shall make a new application for inspection, return the commodities, or destroy the commodities, in accordance with the following rules:
 - (a) For whole batch of toy commodities that do not comply with inspection requirements and are to be returned the commodities, the inspection obligatory applicant shall apply to custom or the local inspection authority to be close the case.
 - (b) For whole batch of toy commodities that do not comply with inspection requirements and are to be destroyed, the inspection obligatory applicant shall submit the destroyed plan to the local inspection authority to be close the case.
 - (c) If toy commodities that could happen the inspection inconformity or part of toy commodities need to be returned, or destroyed, the inspection obligatory applicant shall submit approval letter issued by the BSMI, unsatisfactory inspection notice by the BSMI, Import Declaration (If necessary), and verification document for the modified, adjusted, or reprocessed accessories to the local inspection authority for a new inspection application.
 - (d) The sampling rate of a new inspection application due to toy commodities that the inspection inconformity is exercised pursuant to the provisions prescribed in item (4). Nevertheless, for toy commodities that could happen the inspection inconformity commodities via improvement as necessary sampling items, the double sampling rates shall be exercised.
 - (e) For a new inspection application due to toy commodities that failed the inspection, partial accessories of toy commodity via destroyed and approved by the BSMI that may not be sampled.
- i. Where toy commodities purchased or sampled are inspected to be inconformity with the inspection standards or incomplete inspection procedure before entering market, the same inspection obligatory applicant applies for toy commodities that conform to the provisions via batch-by-batch inspection for the consecutive 10 batches; afterwards, the provisions prescribed in Subparagraph 6 item (2) will be exercised on the follow-up batches and also in accordance with The Commodity Inspection Act.
