

8. Registration of Product Certification (RPC):

- (1) Commodities that have been granted registration may be shipped out of the production premise, or be imported.
- (2) Application for registration of product certification: After applicant has applied for type test in Clause 6, applicant submits hisa copy of the registration document of the company, business, factory or other equivalent establishment registration documents of the applicant , the declaration of conformity-to-type, the type-test report, relevant technical documents, a copy of quality management system registration certificate and/or a copy of factory inspection report as required by the appropriate modulesand other information or technical documents required by the BSMI in Clause 6.4.
- (3) Registration of product certification review period: fourteen working days from application to inspection authorities(excluding the time waiting for supporting document); an additional seven working days after receipt of the samples in case sampling tests is required .
- (4) Once obtained the RPC certificate, the applicant must print the Commodity Inspection Mark , the Roman letter "R" and the designated code, which is the identification number of the RPC certificate.

Examples:

R00000

or

R00000

Note:

R is a Roman letter

00000 mean the serial number or the designated codes

(Different Roman letters means different inspection scheme and different designated codes will be given to different manufacturers or importers)

- (5) If the registered product scope of the registered product certificate is subject to change (for example, the changes of main type or series type, or the amendments of Inspection standards or inspection items, etc.), the obligatory inspection applicant shall apply for the type test report to the original designated laboratory that issued the new type test report, and apply to the

inspection authority for a new certificate
