Commodity Information:

1. C.C.C. Code:

2. Chinese Name:

3. English Name:

4. National Standards

5. Categorization of Types 【* Two types as “cots” and “folding cots” based on the construction. Different cot commodity with the same construct shall be regarded as the same type. Of the cots of same type, those with the largest movable sides or the longest internal lengths shall be the main type. Of the cots of same type (other than the main type), those with different side construct, internal lengths, adjustable gaps of cot bases, materials of cot base or other designing features shall be the series type. Inspection to commodity of series type requires only the inspection to the parts which are different from the commodity of same type (cots with different surface colors and images may be regarded as same type and no additional inspection is required).】

Main Type

Main Type Classification	Model	Designing Features of Cot				Color Photo	Remark
		Side Construct	Internal Lengths	Adjustable Gaps of Cot Bases	Materials of Cot Base		

Series Type

Series Type Classification	Model	Designing Features of Cot				Color Photo	Remark
		Side Construct	Internal Lengths	Adjustable Gaps of Cot Bases	Materials of Cot Base		

Note: If the difference between the series type and the main type cannot be filled in the above columns, please describe such difference in the column of “Remark”.
