## Type Classification Table of Products

[Applicable to Cribs and Cradles of Domestic Use]

Applicant: \_\_\_\_\_ Tel: \_\_\_\_\_

Address: \_\_\_\_\_ Fax: \_\_\_\_\_

Product information:

1. CCC Code: \_\_\_\_\_

2. Chinese name: \_\_\_\_\_

3. English name: \_\_\_\_\_

4. National standard: \_\_\_\_\_

5. Type classification [\*The types of main structure materials are divided into two types, metal and non-metal. Cribs/cradles products with the same main structure and material shall be of the same type. Among the same types, the one with the most complicated structure shall be the main type, and those other than the main type shall be the series of type. Products of the series of type may only be tested for differences from the products of the main type (different colors and patterns may be regarded as the same type, and no additional testing is required)].

Main type

Main Type Classification	Model	Material of the Main Structure	Size (L x W x H)	Internal Length	Color	Color Photos	Remarks

Series of Type

Series of Type	Model	Material of the Main Structure	Size (L x W x H)	Internal Length	Color	Color Photo	Remarks
1							
2							
3							

Note: If it is unable to fill in the differences between the products of the series of type and the main type, please describe in the column of "Remarks."
