- (1) Capital (or share capital).
- (2) Capital surplus.
- (3) Retained earnings (or accumulated deficit).
- (4) Other Equity.
- (5) Treasury share.

#### Article 15

Current assets, a business entity expects to realize, or intends to sell or consume the asset, in its normal operating cycle; holds the asset primarily for the purpose of trading; expects to realize the asset within twelve months after the date of statement of financial position; the asset is cash or a cash equivalent. Unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the date of statement of financial position.

Current assets including account items as follows:

1. Cash and Cash equivalent: cash on hand, demand deposits, and short-term, highly liquid certificate deposits or investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

2. Short-term investment: defined as investment that is short-term, including account items as follows, provided as a lien, collateral or refundable deposit, etc. shall be disclosed.

(1) Financial assets measured at fair value through profit or loss-current:

A. Financial assets not measured at amortized cost, measured at fair value through other comprehensive income or financial assets measured at cost.

B. Financial assets measured at amortized cost or measured at fair value through other comprehensive income which be designated as financial assets measured at fair value through profit and loss at the time of initial recognition.

(2) Financial assets measured at fair value through other comprehensive income-current:

A. Debt instrument investments that meets all of the following conditions:

a. Holds the financial assets within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

b. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

B. Equity investments not held for trading, for which the entity has irrevocably elected at initial recognition to present changes in fair value in "other comprehensive income".

(3) Financial assets measured at amortized cost – current, meaning all of the following conditions are met:

A. The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows.

B. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(4) Financial assets measured at cost-current: Investments in equity instruments that do not listed and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity instruments.

(5) Financial assets for hedging-current: Any financial asset that is a designated and effective hedging instrument under hedge accounting requirements.

3. Notes Receivable: defined as various notes which are collected by the business entity.

(1) Notes receivable should be measured at amortized cost as a principle. However, short-term notes

receivable with no stated interest rate may be measured at the original invoice amount if the effect of discounting is immaterial.

(2) Notes receivable that were discounted or transferred to others shall be disclosed.

(3) Notes receivable arising from operations shall be presented separately from those not arising from operations.

(4) Large-sum notes receivable from related persons shall be presented individually.

(5) Notes receivable that are provided as collateral shall be disclosed.

(6) Notes receivable determined to be uncollectible shall be written off.

(7) Notes receivable shall be valued at the date of statement of financial position for the unrecoverable amount, and any allowance for the uncollectible amount shall be properly provided and presented as the contra account of the notes receivable.

4. Accounts receivables: defined as the claim of the business entity resulting from sale of goods or services.

(1) Accounts receivable should be measured at amortized cost as a principle. However, short-term accounts receivable with no stated interest rate may be measured at the transaction amount if the effect of discounting is immaterial.

(2) Large-sum accounts receivable from related persons shall be presented individually.

- (3) Unrealized interest revenues from installment sales shall be presented as the contra account of the accounts receivable.
- (4) Accounts receivable to be collected over one year, shall be disclosure for the amount of expected collection of each year.
- (5) Accounts Receivable have been collateralized, shall be disclosed.
- (6) Accounts receivable determined as uncollectible shall be written off.
- (7) Accounts receivable shall be valued at the financial position date for the unrecoverable amount, and any allowance for the uncollectible amount shall be properly provided and presented as the contra account of the trade receivables.
5. Other receivables: defined as the receivables that do not belong to the notes receivable and accounts receivable.
- (1) Other receivables shall be valued at the date of statement of financial position for the uncollected amount, and any allowance for doubtful accounts shall be properly provided and presented as the contra account of the other receivables.
- (2) Where the receivables are classified greater detail, the allowance for doubtful accounts shall also be presented accordingly.
6. Current tax assets: defined as the portion of the tax amount already paid in respect of current and prior periods that exceed the amount due for those periods.
